

Claire Sharpe is Professor of Renal Medicine at King's College London/King's College Hospital. She runs a research programme in the progression of chronic kidney disease and specialises in the care of patients with sickle cell nephropathy. She has been involved in the renal/sickle cell clinic at KCH since its inception in 2004 and has developed a strong interest in studying the pathophysiology and management of sickle cell nephropathy. She has been invited to deliver over 30 lectures internationally, has published 8 papers in peer-reviewed journals and authored 5 book chapters on the subject.
