

Dr Emmanuel Ako is a Consultant Cardiologist working at the Royal Brompton, Hammersmith Hospital and Chelsea & Westminster Foundation NHS Trusts. He has expertise in General Medicine and Cardiology with sub-specialty expertise in coronary intervention. He is a specialist in assessing patients with chest pain, breathlessness, palpitations, hypertension, valvular heart disease, dizziness, faints, and ankle swelling. Dr Ako is an expert in the management of coronary artery disease, including microvascular angina and acute myocardial infarction (heart attacks). He performs coronary angiography, coronary physiology measurements and coronary angioplasty (stenting). He is a world expert on the management of cardiovascular complications in haemoglobinopathies such as Thalassaemia and Sickle Cell Disease. Dr Ako has received several international awards, published widely and participates in active research in the cardiovascular field.
