

Naomi Rov, Consultant Haematologist, Rare Anaemias
Experience and interests are in haemoglobinopathies and rare inherited anaemias (particularly CDA-1). I have experience in the molecular and phenotypic diagnosis of rare inherited anaemias including Diamond-Blackfan Anaemia, Congenital Dyserythropoietic Anaemias, Sideroblastic Anaemia and the red cell enzyme and membrane disorders. I have experience in the management of all these disorders, as well as difficulties with iron overload.
