

Victoria Potter is a Consultant Haematologist specialising in stem cell transplantation at King's College Hospital NHS Foundation Trust, London, UK. She completed early postgraduate and specialty training in Sydney, Australia followed by a clinical fellowship at King's College Hospital. In 2017 she was appointed Transplant Director at Kings College Hospital. She has specialist interests in the development of transplantation strategies for sickle cell disease and prevention of relapse post-transplant for haematological malignancies. Dr Potter is active within EBMT working parties and a JACIE inspector. She is currently secretary of the BSBMT clinical trials committee, and the IMPACT PI for Kings College Hospital.
